We can answer the objection you'll have before approving.

Your analysis already gave us the answer. Why do we need you for six more weeks?

The list is from Sept 30 data, and cards change every week. We recheck all 440 before anything ships, so no card goes out early or twice. We send the 211 longest-waiting first, and give you one weekly view of cards sent and dollars spent against $3,520.
